Track One: Off-Grid Anthem

[Verse]

I ain't got no water well

I gotta haul it all from town

And I ain't got no garbage pickup

I gotta haul it all back down

And I ain't got no driveway

Gotta go slow so I don't get stuck

And I ain't got no mansion

But I do got a home

And my four wheelin' pickup truck

[Chorus]

I got clean air and wildlife and open space

And I got peace and quiet and freedom

Baby

I got everything I need

It all makes me happy

Yeah

I got it all

I got it all

[Verse 2]

I ain't got no red lights

No sidewalks

No high rent

And I ain't got no worries

No bills

No stress

And I ain't got no problems

No drama

No concerns

And I ain't got no questions 'cause I already learned

[Chorus]

I got clean air and wildlife and open space

And I got peace and quiet and freedom

Baby

I got everything I need

It all makes me happy

Yeah

I got it all

I got it all

[Chorus]

I got clean air and wildlife and open space

And I got peace and quiet and freedom

Baby

I got everything I need

It all makes me happy

Yeah

I got it all

I got it all

[Outro]

Yeah

I got it all

I got it all

Track Two: Nature Is My Therapist

[Verse 1]

Shoes off at the trailhead

Breathing in the quiet air

Every worry feels a little smaller

Under all this ancient care

Moss between my fingers

Pine needles in my hair

I let the noise fall from my shoulders

Like I was never there

[Chorus]

Nature is my therapist

I come here when my chest feels tight

In the forest I cleanse my energy

Let the green wash out my fight

On the water I renew my positivity
Watch the ripples carry what I can't keep
Nature is my therapist
And I can finally sleep

[Verse 2]

Sunlight through the branches
Paints patterns on my skin
Heartbeats start to match the rhythm
Of the world I'm walking in
Talking to the river
Though it never says a word
Still it answers every question
In a language that I heard

[Chorus]

Nature is my therapist
I come here when my chest feels tight
In the forest I cleanse my energy
Let the green wash out my fight
On the water I renew my positivity
Watch the ripples carry what I can't keep
Nature is my therapist
And I can finally breathe

[Chorus]

Nature is my therapist

I come here when my chest feels tight
In the forest I cleanse my energy
Let the green wash out my fight
On the water I renew my positivity
Watch the ripples carry what I can't keep
Nature is my therapist
And I can finally breathe

Track Three: A Spark Inside Our Minds

[Verse]

With a spark inside our mind
A vision we will find
Dreams start to come into sight
Shaping futures, burning bright

[Chorus]

We shape our destiny each day
Inspiration leads the way
Imagination sets us free
Inventing what will be

[Bridge]

Intention couples with desire
Reaching ever higher
No limits to what we can do
Making every dream come true

[Chorus]

We shape our destiny each day

Inspiration leads the way

Imagination sets us free

Inventing what will be

[Outro Short]

Future's in our hand

We will make our stand

The brotherhood of man

Across the promised land

Track Four: Till I See You, John

[Verse 1]

Rain on the window

Two cups

Just one chair

I still set a place for you

Like you might meet me there

Silver frames and faded smiles

You in your Sunday best

I trace the lines of your young face

My hands are old

My heart is restless

[Chorus]

I'll hold on

Till I see you John

Where every tear we never cried

Is turning into dawn

We had a moment

But it carries me along

I'm growing old down here

But with you I'm young

Till I see you John

[Verse 2]

Church bells on Sunday

I sing the hymns we knew

I still hear your quiet voice

From the back-row wooden pew

Neighbors talk of travel

Vacations by the sea

I just smile and change the subject

You were the world to me

[Chorus]

I'll hold on

Till I see you John

Where every tear we never cried

Is turning into dawn

We had a moment

But it carries me along

I'm growing old down here

But with you I'm young

Till I see you John

[Bridge]

They say time is a healer

But it never touched this part

It only made more room

For you inside my heart

When the sky finally opens

And I hear that gentle call

You'll be running like the springtime

I'll be twenty again

That's all (ooh)

[Chorus]

So I'll hold on

Till I see you John

Where every day we never had

Is waiting all along

We had a few years

But our love keeps marching on

I'll close my eyes down here

And wake up young

In your arms

My John

[Outro]

Rain on the window

Fading with the night

I'll keep your coffee warm

Till I meet you in the light

Track Five: Carry On, Starseed

[Verse 1]

You woke up strange in your own hometown

Reading sky maps in the cracks of the ground

Every mirror saying

"You don't belong"

Heart keeps humming that ancient song

[Pre-Chorus]

You feel the grief of a thousand years

Like a storm collecting behind your tears

But under your ribs

There's a golden code

Flaring bright every time you're told

[Chorus]

Carry on

Starseed

Carry on

You were built from distant dawn

When the world feels way too heavy

You're the reason it goes on

Carry on

Starseed

Carry on

You're the quiet

Steady sun

Every time they try to dim you

Let your light outrun everyone (carry on)

[Verse 2]

You see halos in the crowded trains

Little signals in the window rain

Other sleepers with the same old ache

Same soft fire they're scared to wake

[Pre-Chorus]

You're here to stitch every shattered part

To sneak in hope like a work of art

Each kind word is a fault line cracked

Letting love pour in and never back

[Chorus]

Carry on

Starseed

Carry on

You were built from distant dawn

When the world feels way too heavy

You're the reason it goes on

Carry on

Starseed

Carry on

You're the quiet

Steady sun

Every time they try to dim you

Let your light outrun everyone (oh, carry on)

[Bridge]

They'll call you crazy

They'll call you lost

They don't see you counting every cost

But there's a signal in your spine that says

"Keep going

Keep glowing

Lift your head"

You're not alone in this heavy night

There are thousands waking to this sight

Every breath you take in faith and fear

Helps a sleeping world draw you near

[Chorus]

Carry on

Starseed

Carry on

You were built from distant dawn

When the world feels way too heavy

You're the reason it goes on

Carry on

Starseed

Carry on

You're the quiet

Steady sun

Every time they try to break you

Know your work has just begun

Carry on

Starseed

Carry on

Track Six: A Call For Love

[Verse 1]

When you're breaking down

And the world seems cold

A way of a beautiful heart

Is to see all human behavior

As one of two things

[Prechorus]

It's love or a call for love

It's love or a call for love

[Chorus]

Ooh

It's love or a call for love

Ooh

It's love or a call for love

[Verse 2]

Do you hear it?

Are you there?

Do you feel it?

Can you care?

[Prechorus]

It's love or a call for love

It's love or a call for love

[Chorus]

Ooh

It's love or a call for love

Ooh

It's love or a call for love

Track Seven: They Called Me Opie

[Verse 1]

I grew up by the water where the lake meets the sky

Little town in Wisconsin, stars came out early at night

Saturday cartoons hummin' in a black-and-white glow

But I was already gone, chasin' places I didn't know

Sugar buzz and bare feet, Kool-Aid on my breath

Climbin' trees, skippin' stones, testin' luck for myself

While the whole town gathered round that TV light

I was out makin' my own kinda Saturday night

[Pre-Chorus]

Funny how the things you miss

End up findin' you just like this

[Chorus]

They called me Opie

Rubbed my head for luck

They called me Opie

Said "hey red-head, don't you duck"

I didn't know why

I just let it be

Guess I started believin'

What everybody saw in me

[Verse 2]

Didn't know the show, didn't know the name

Didn't know the rules of that lucky-day game

Just knew folks would stop me on Main Street outta the blue

Say "Give me some good luck, kid," like I knew what to do

Years later I learned 'bout a small-town scene

A freckled-face kid on a black-and-white screen

Funny how belief starts off very small

Then starts growing till you feel ten feet tall

[Pre-Chorus]

Ain't it strange how the seed gets sown

When you're just a kid tryin' to find your way home

[Chorus]

They called me Opie

Rubbed my head for luck

They called me Opie

Said "boy take away my yuck"

I didn't question

I just leaned right in

Turns out luck's just faith

That you learned way back when

[Bridge]

Some folks forget how to play

Some folks trade wonder for pay

But kids don't doubt, they just pretend

And somehow that's where magic begins

Didn't someone wise once say

You gotta be child-like to see heavenly days?

[Chorus]

They called me Opie

[half-time feel]

Maybe they were right

Luck's just believin'

In a warm afternoon light

If you dream it easy

If you let it start

The world starts movin'

Right where you are

[Final Chorus]

They called me Opie

Rubbed my head for luck

They called me Opie

Left a mark I still carry enough

I kept believin'

What I felt back then

I never stopped seein'

The world like a kid again

[Outro]

Still got a lucky star over me

Still believe in what I can't yet see

Track Eight: Ode To Holly

[Verse]

Cruisin' the streets of Dallas one fine spring day.

I saw her standing there, she took my breath away.

A Midwest angel fine, with eyes of ocean green.

Holly, a leather jacket vision, looking so serene .

[Chorus]

Holly, yeah, her laugh's the sound of angels singing high.

Her smile's the sunlight splashed across a clear blue sky.

She's the bright flame burning in this lonely town.

The one true harmony that keeps me spinning round.

[Verse]

Her voice was sweet as wine, like velvet flowing free.

She had that rich tone, baby, a 70s rock energy.

She was calm and chaos all rolled into one

Passionate fires burn bright, but not for very long..

[Chorus]

Holly, yeah, her laugh's the sound of angels singing high.

Her smile's the sunlight splashed across a clear blue sky.

She's the bright flame burning in this lonely town.

The one true harmony that keeps me spinning round.

[Chorus]

Holly, yeah, her laugh's the sound of angels singing high.

Her smile's the sunlight splashed across a clear blue sky.

She's the bright flame burning in this lonely town.

The one true harmony that keeps me spinning round.

Track Nine: A Spark Inside Us

[Verse]

With a spark inside our mind

A vision we will find

Dreams start to come into sight

Shaping futures, burning bright

[Chorus]

We shape our destiny each day

Inspiration leads the way

Imagination sets us free

Inventing what will be

[Bridge]

Intention couples with desire

Reaching ever higher

No limits to what we can do

Making every dream come true

[Chorus]

We shape our destiny each day

Inspiration leads the way

Imagination sets us free

Inventing what will be

[Outro Short]

Future's in our hand

We will make our stand

The brotherhood of man

Across the promised land

Track Ten: Stars Alive

[verse]

Stars alive, planets breathe

Every atom, preconceived

With a thought, pure energy

A conscious universe, you see

[chorus]

It's in the air, it's in the earth

a single mind, that gives it birth

A cosmic dream, from Source its flow

Everything's alive, we know

[bridge]

The mountain dreams, the river sighs

Beneath the vast and watchful skies

A flower blooms, part of the whole

The big the small, all sharing soul

[outro-short]

Connected all, a cosmic sea

Pure consciousness, that's you and me

Track Eleven: Carry On, Little Starseed

[Verse 1]

You wake up wired in a world that feels sideways

Family portraits where you still feel alone

Reading rainclouds like they're coded in your language

Homesick for a sky you've never known

[Pre-Chorus]

Every crowded room

Makes you disappear

But your heart keeps humming

“We’re almost here”

[Chorus]

Carry on

Little starseed

You were sent for the hard days

When the hope runs dry

You’re the quiet sunrise

Carry on

Little starseed

You remember what we forgot

When the world says “stop”

You’re the signal that never shuts off

[Verse 2]

You see storms breaking underneath a stranger’s eyelids

You touch their hand

And the thunder turns to rain

You hold space

Like it’s your first and only mission

Turning buried hurt into growing pains

[Pre-Chorus]

Every “you’re too much”

Every “you’re too weird”

Is a rusted lock

You're the key they feared

[Chorus]

Carry on

Little starseed

You were sent for the hard days

When the hope runs dry

You're the quiet sunrise

Carry on

Little starseed

You remember what we forgot

When the world says "stop"

You're the signal that never shuts off

[Bridge]

They taught you to shrink

So they wouldn't have to rise (oh)

But you came here blazing

Smuggled light in your eyes

When the night gets loud

And the doubt gets deep

Just breathe that ancient promise

"We will not sleep"

[Chorus]

Carry on

Little starseed

You were sent for the hard days

When the hope runs dry

You're the quiet sunrise

Carry on

Little starseed

Every scar is a secret map

When you feel too small

That's exactly where the change breaks out

[Outro]

So carry on

Carry on (hey)

Every heartbeat

Sending home your call

You are not alone

Little starseed

You are why the darkness cracks at all
